

"My passion: Store, visualize and use data to create value in your corporation"

Progranova Inc.

1002-1920 BOUL DU SOUVENIR
LAVAL, QC H7N 0B3

Dear prospective client,

Summary

With 5 years of experience in information technology, I have learned and apply my knowledge to different companies such as Desjardins, Raymond Chabot Grant Thornton and CAE. My passion for the data pushes me day after day to find solutions to create value from them. By setting up a data lake at Desjardins, to the application of artificial intelligence to classify stocks at CN Investment Division, I'm always ready for my next mission. I hope I can use my skills for your project.

Why Progranova?

Progranova has many years of experience in the new technologies' market in Montreal. Now specialized in artificial intelligence, big data and cloud computing, Progranova is able to use its expertise in several sectors of activity to create tangible value from data. Business sectors such as aeronautics, banking, manufacturing, education, transportation and software development to name a few. Progranova exists to invent and develop the world of tomorrow.

Why Me?

I am like a Toyota. I do not require maintenance, I am reliable and I lead my projects safely. In addition, I am open to criticism and I know how to handle the pressure. With my varied experiences, I have been able to develop solutions to many of the existing problems in the artificial intelligence, big data and cloud computing industry. Concretely, the security of data in open source solutions throughout a process of calculating a model and more.

I look forward to creating value in your business.

Sincerely,

François Thérour
